PRIYANSHI SAKARIYA

Python Developer

Ahmedabad, Gujarat | +91 9773188083 | priyanshisakariya89@gmail.com | LinkedIn | GitHub

SUMMARY

Detail-oriented Python Developer with hands-on experience in building web applications, REST APIs, and automation scripts using Python and SQL. Proficient in object-oriented programming, data structures, and version control (Git). Strong problem-solving skills with a solid foundation in software development life cycle (SDLC), unit testing, and debugging. Eager to contribute to scalable, efficient software solutions in a collaborative team environment.

EDUCATION

Master Of Computer Application(MCA) 2025-2027, Ahmadabad
Sardar Vallabhbhai Global University
SEM 1-CGPA : 8.5 | SEM 2-CGPA : 8.8

Bachelor of Computer Application(BCA) 2022-2025, Rajkot
SMT K.S.N Kansagra Mahila College
CGPA : 7.6

SKILLS

Programming: Java, Python, JavaScript, Node.JS
Frameworks: React.js, Spring Boot
Web: HTML, CSS, REST APIs
Database: MySQL
DevOps & Cloud: Git, GitHub, Docker, Terraform, Jenkins, CI/CD, Linux, AWS (EC2, S3, CloudFront)
Development & Build Tools: Git, GitHub, Maven, Postman, Spring Tool Suite (STS), Visual Studio Code
Core Concepts: OOPs, Data Structures, DBMS

CERTIFICATION

• Python Programming | freeCodeCamp | Certificate
• Developing Secure Software | The Linux Foundation | Certificate
• Data Structures & Algorithms | ScholarHat | Certificate
• React.js | Cursa | Certificate
• AWS CloudFront | Coursera | Certificate
• Introduction to Generative AI | Google Cloud | Certificate

PROJECTS

Flight Crew Management System|Python|React.Js| FastAPI |SQLAlchemy| Pydantic, PyJWT, Bcrypt,SQLite (Link)

- Designed relational database schemas (SQLAlchemy 2.0) across 5 core entities (Users, Crew, Flights, Availability, Assignments) with foreign keys and cascade integrity rules.
- Created a dedicated scheduling engine (`conflict_service.py`) executing time-interval intersection checks `[start - buffer, end + buffer]` to prevent concurrent duty assignments across transit windows.
- Secured API surface using OAuth2/JWT bearer tokens, password salt-hashing via Bcrypt, and strict role authorization middleware distinguishing Admin vs. Crew permissions.
- Automated interactive API documentation via OpenAPI/Swagger UI and built an automated test runner validating data integrity and edge-case conflict handling.

Campus Project|React.js|Spring Boot|JWT|Role-Based Access Control(RBAC)|REST API | PostgreSQL (Link)

- Developed a full-stack Student Project Management System **serving 3 user roles (Student, Faculty, Admin)**, streamlining the academic project lifecycle using JWT Authentication and Role-Based Access Control (RBAC).
- Built **3 dedicated dashboards** supporting proposal submission, mentor assignment, project approval, weekly progress tracking, and final project submission.
- Implemented secure file uploads for **3 file types** (PDF proposals, PDF reports, ZIP source code), along with faculty review, comments, and approval/rejection workflow.
- Designed and integrated **10+ RESTful API endpoints** with Spring Boot, React.js (Axios), and MySQL for authentication, user management, project workflows, and reporting.
